

evius

 MADEINITALY

2014

Introduction

The social goal of Evius is actually to **increase your own safety while travelling**, especially by car. Would you like to drink tonight at the local club but none of your friends is willing to skip that either? Evius will allow you to find a **safe** (and **sober**) driver that will take you to the event and back home in **maximum safety**.

Evius is the new paradigm of **events and social travels**. In this guide, the term “event” will be referred to one or more of the following events:

- Sport events (ranging from huge sports events to jogging in the local park with friends)
- Musical events (concerts, music festivals, etc...)
- Exhibitions (artistic, musical, etc...)
- Congresses, conferences, seminars
- Theatric events (cinema, operas, ballets, ...)
- Dancing (clubs, classical dancing, ...)
- Festivals and parties
- Circuses and street shows
- Markets
- Religious holidays and events
- Award ceremonies and competitions
- Courses, internships and workshops

Evius is useful in any of these cases:

- You are the **organizer of an event** and you want other people to know about it and possibly join it.
- You are looking for a specific event or a particular kind of event.
- You have some spare time and do not know how to fill it. Evius will provide you with a list of events or activities to make the most out of your spare time.

Once you have chosen an event, you may find yourself in at least one of these situations:

- You actually have to **reach the event**. Evius will help you **find an option of transportation** for you amongst the possible transportation services by choosing the best option provided based on distance and cost.
- You **make yourself available for carpooling** with other people to the event. You will have to specify how many people you will be able to carry and possibly request something in return for taking them there. The request may just simply be friendship or possible fuel money. The money transfer may actually happen as an in-app payment, preventing you from being tricked.
- You may live near the place where the event will take place, or live far away but still want to reach the event on your own, or any other case that might cross your mind. You will then have the chance to reach the event alone, without making your fate dependent on anyone.

Requisites of Evius

- Any Windows Phone capable device, running version 8 or newer.
- Active data connection on the phone, either Wi-Fi or mobile.

Explaining the usage of the app

Warning: as Evius is still in development, not everything that's present in this guide might work as intended or be present at all. Rest assured everything will be fine within the last submit before the presentation.

At the first launch, Evius will give you the chance either to **log in** with an existing account or to **register** a new one.

Should you already have an Evius account you will be able to log in with it to resume your activities where you left last time. The login details to try this app, with everything set-up and working, are the following:

- Account 1:
 - Username: sample1@microsoft.com
 - Password: sample
- Account 1:
 - Username: sample2@microsoft.com
 - Password: sample
- Account 1:
 - Username: sample3@microsoft.com
 - Password: sample

create new account

Should you be a **new user** of Evius, here you will be able to create a new account, by simply providing your email address, a username and a password.

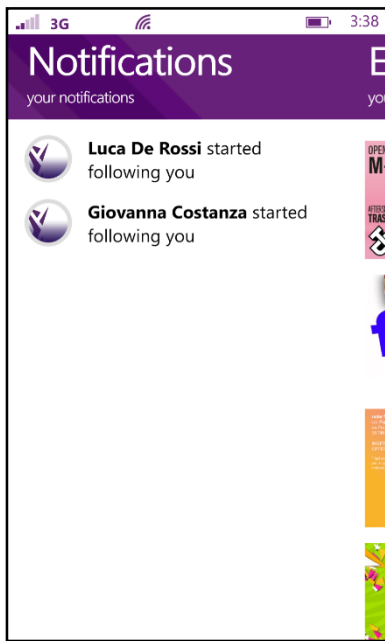

Now you can login into Evius with the account you just created.

Once you are logged in, you will be able to see the main screen of Evius.

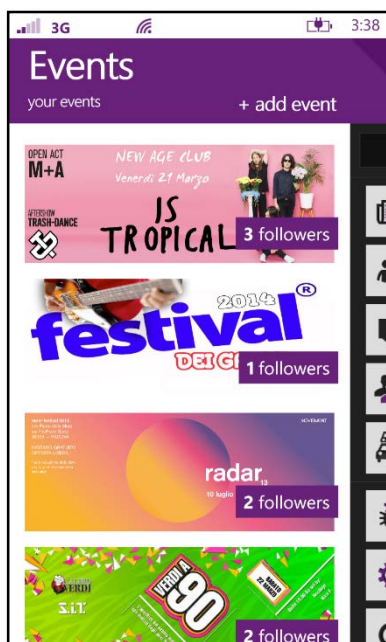

This window allows you to **check what your friends have been doing** lately and what they are going to do in the near future. Should you be interested in joining them, you are just a few taps away from it. Tap on any shown event to check the details.

Perform a pull down of the page to refresh it with the latest content available.

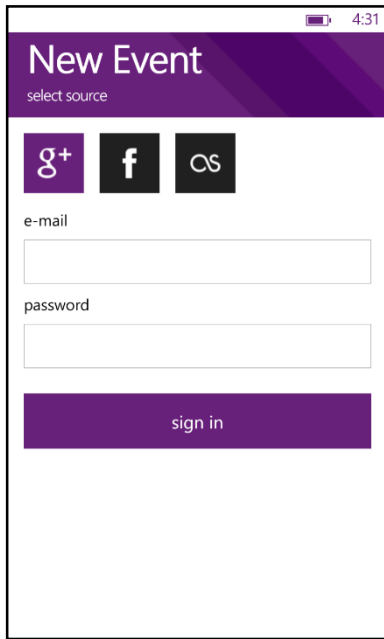

Swiping to the right will introduce you to this screen:

This page notifies you about your **personal stuff**, such as about another user who has requested you a ride to a certain event or a request you have sent that has been confirmed by the driver.

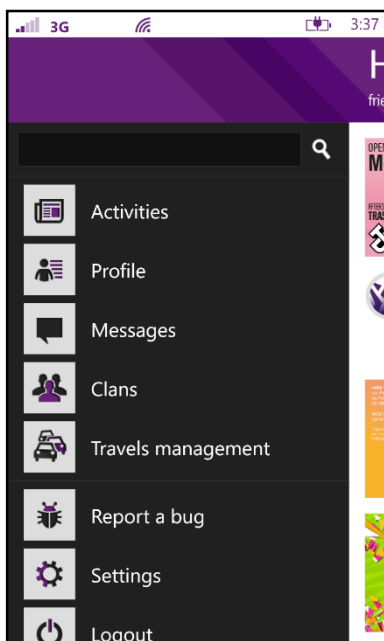

Swiping once more to the right will show you the events you have opted in to attend, together with the number of participants for each event and the image associated with it.

Press on the “+ add event” button to load this page.

Here you will be able to import an existing event from a variety of social networks, such as google+, Facebook, Last.fm, or create a new one directly into Evius.

(Feature not fully implemented yet).

Moving back and swiping a third and final time to the right, will finally show you the **main hub** of Evius.

Here you will be able to choose among the following options:

- Search Box
- Activities
- Profile
- Messages
- Clans
- Travels management
- Report a bug
- Settings
- Logout

Let's go through each one of these features!

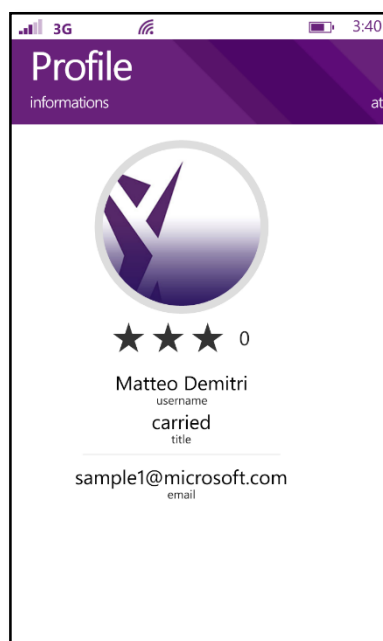

SEARCH BOX – not implemented yet

Type in the box to **browse through Evius's** events, users and pages.

ACTIVITIES – not implemented yet

Tap this to **move to the Home tab**. This feature **automatically refreshes your data**, so it won't be necessary to perform a "Pull to Refresh" action to get the latest feeds.

PROFILE:

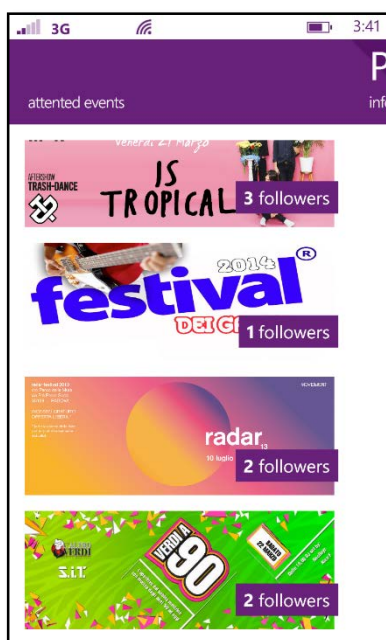

Here you will be able to check how your profile is seen by other people visiting it. It is your main presentation to any other Evius user, and it shows these key informations about you:

- **Username:** your alias on Evius.
- **Title:** your **most practiced role** when joining events. It may actually be either:
 - **Driver:** out of all the events you have joined via Evius, in most cases you have preferred to make yourself available to carry people to the events location.
 - **Carried:** out of all the events you have joined via Evius, in most cases you have preferred to ask other people for a transportation to the events locations.
 - **Solo:** out of all the events you have joined via Evius, you have mostly preferred travelling alone.

- **Profile picture:** how other people actually see your face on the Evius network. **Choose wisely your picture**, don't place a fake or indecent one, other users might not appreciate that.
- **Rating:** displays how many ratings you have received from other Evius users, and the average of those ratings. **3 stars is the max rating, 0.5 is the lowest** you can reach. In the latter case, what have you done to get so much negativity?
- **Email:** the email address you have used to register to the Evius network. **In case you are offering rides, you will not be able to hide this field from other people** viewing your profile. Otherwise, from the app settings, you will have the option to either show or hide it.
- **Date of birth:** you can always choose to hide or show this field from other users' sight.
- **Telephone number:** you are **forced to show it if you are offering a ride**, or else you can decide whether to show it or not via the app settings.

Swiping left or right will show you (and other people visiting your profile, of course) what events you are **actually signed up** for and what other Evius events you have **attended in the past**. You are given the option to **hide events** you are going to attend (or have attended in the past) from being displayed to other people visiting your profile, simply by clicking the small 'x' on the right top of each event box.

MESSAGING – not implemented yet

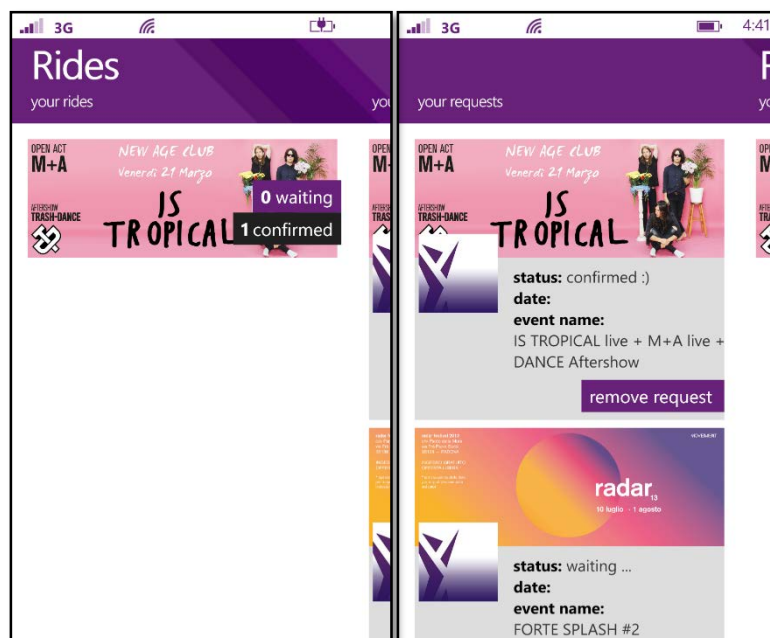

This allows you to **keep in touch with your friends**.

CLANS – not implemented yet

Gather friends who **share common interests** in clans to ease up the sharing of new events.

TRAVEL MANAGEMENT

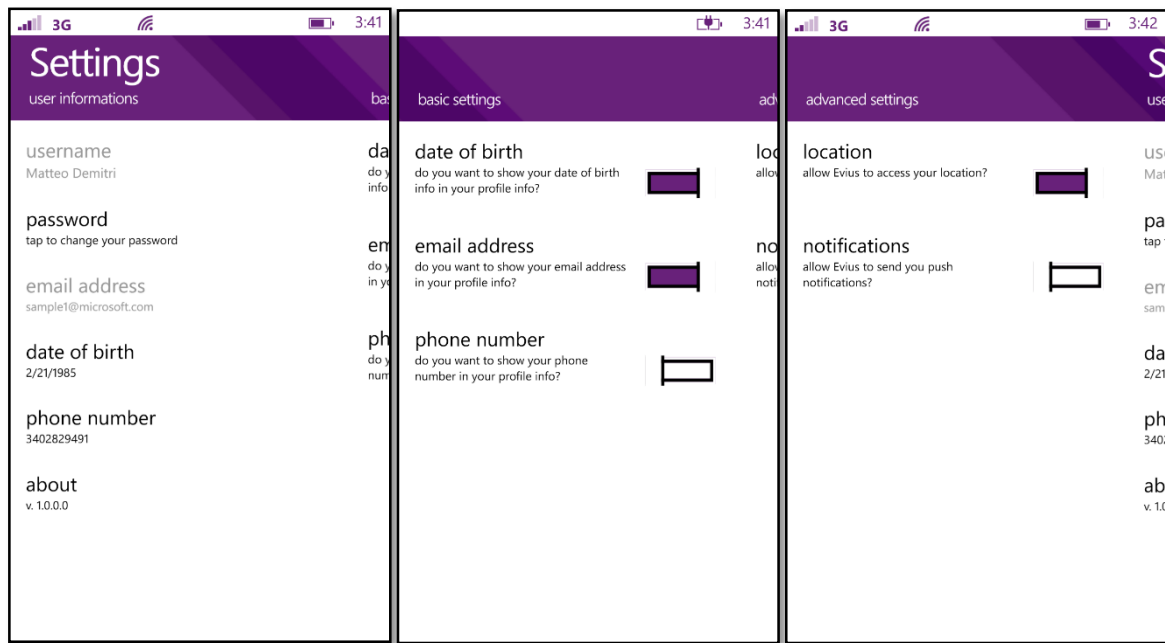

This section allows you check the **queue of rides** you have been asked for, the ride requests you have refused to accommodate and the ride requests you have accepted.

Bug Report

Write us an email message to report a bug you encountered while using the app, we will be grateful to you for that! Even better, you could use this same form to send us advice to improve Evius. We will be even more grateful!

Settings

This section is composed of **three tabs** that allow you to change the main settings of the application.

- First tab
 - **Username:** nothing to do here. Your username cannot be changed. For any issue regarding this topic, contact the Evius development team to request a "Username change".
 - **Password:** tap this to change the password that you use to log in to Evius.
 - **Email address:** check on the second tab for a show/hide option.
 - **Date of birth:** check on the second tab for a show/hide option.
 - **Phone number:** check on the second tab for a show/hide option.
 - **About:** shows you the current version of the app, together with informations about the license agreement and the privacy rules of Evius.
- Second tab
 - **Date of birth:** move the slider to either publically show your date of birth or hide it.
 - **Email address:** move the slider to either publically show or hide your email address. You cannot hide it if you are offering rides.
 - **Phone number:** move the slider to either publically show or hide your phone number. You cannot hide it if you are offering rides.
- Third tab
 - **Location:** choose whether Evius can track and keep records of your position or not.
 - **Notifications:** choose whether Evius can show you notifications or not (**toasts notifications/live tiles/lock screen**).
